

SPECIFICATION SHEET FOR
NUTRI-PAK® 18-6-12 1-YEAR
CONTROLLED RELEASE FERTILIZER PACKETS

Commercial Fertilizer:

Nutri-Pak® 18-6-12 is recommended for new or established roses and flowering plants.

Standard Formulation: Guaranteed analysis of 18% total Nitrogen, 6% available Phosphoric Acid and 12% soluble Potash (**18-6-12**) packaged in a patented controlled release packet.

Nutri-Pak® ½ oz. packets provides nutrients to plants in pots or hanging baskets for one year when used indoors or in climates with a year-round growing season, and up to two years when used outdoors in climates with a dormant season.

Nutri-Pak® is applied next to the roots, with no danger of burning. It feeds the roots directly with no loss of nutrients through runoff or leaching. Since the packets are installed unopened, it is not only easy to use, but it's safer for you to handle because you never come into contact with the fertilizer itself.

Caution: Nutri-Pak® packets are **not** to be opened and emptied directly into the soil. This would destroy the long-term effectiveness of the product, and nullify the controlled release design of the special packaging. In addition, it might cause root burn.

Directions:

Foliage Pots & Hanging Baskets

Use 1-2 packets for 4-10 inch, 2-3 packets for 11-14 inch and 3-4 packets or more for 15 inch and up. Bury packets unopened in the pot or basket, halfway between the plants stem and the edge of the pot or basket, and halfway down or about 3 inches below the surface of the soil.

Nutri-Pak® is a product of JRP International, Inc.
